

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. **NOTE.**—*The distances to and from the Town of NEWRY shown herein are those by direct Railway line, but the quickest way of reaching the Town is to leave the train at the Bessbrook and Newry Station of the Dublin and Belfast Railway, the distance from this Station to either the Borough or the Barracks at Newry being only  $1\frac{1}{2}$  miles by road.*

*The distances from Bessbrook and Newry Station to places situated northward can be ascertained on reference to page 104, and to places southward to page 55.*

## EXPLANATION.

The object of this book is to place in the hands of all concerned in the movement of troops and others a ready means of ascertaining the correct railway distance from any one station to another in Ireland, and also the *route* by which to proceed.

A few words of explanation will show the plan upon which the book has been constructed.

Certain towns possessing railway stations (comprising garrison, county, and other towns, and principal junctions, which by their positions help the object in view,) have been selected, and, for purposes of distinction, are denominated **PRINCIPAL STATIONS** (*see* Index). These principal stations have been alphabetically arranged as, and dealt with under, separate headings. A reference to any one of them will give at a glance the exact distance therefrom to every other.

All other stations (called **INTERMEDIATE**) have no separate headings, but appear in their alphabetical order under the headings of the nearest principal stations, as, for instance, all stations between Castlereagh and Roscommon (Principal Stations) are given both under Roscommon and Castlereagh. The result is that every railway station in Ireland is included in the book either as a principal or intermediate station.

By this method the entire railway system of Ireland is at once connected, north, south, east, and west.

The only point to be kept in view is the distinction between principal and intermediate stations, and as one is distinguished from the other in the index given at the commencement of the work the difference can always be ascertained.

An example or two will show the working of the plan.

### *Example 1.*

Distance required. Castlereagh to Roscommon :—

Both of these are principal stations. Refer to Index, and they will be found, both at page 35 and page 106, under each of which headings the distance is given, at a glance

	Miles.
- - -	16½

*Example 2.*

Distance required. Donamon to Cork :—

Donamon is an intermediate and Cork is a principal station. Refer to Index, where Donamon is shown as at pages 36 and 106, under the respective headings of Castlereagh (northward of it) and Roscommon (southward of it), the two nearest principal stations. As Cork is southward of Donamon, the required distance must be ascertained under

Roscommon at page 106, viz. :—

	Miles.
Donamon to Roscommon - - -	5 $\frac{1}{2}$
Roscommon to Cork - - -	180 $\frac{1}{2}$
Total - - -	<u>186<math>\frac{1}{2}</math></u>

Distances northward of Donamon must be ascertained under Castlereagh at page 36, viz. :—

Distance required. Donamon to Westport :—

Donamon to Castlereagh - - -	10 $\frac{1}{2}$
Castlereagh to Westport - - -	48 $\frac{1}{2}$
Total - - -	<u>59<math>\frac{1}{2}</math></u>

A railway map of Ireland is attached, showing all principal stations in large, and all intermediate stations in small type; and which will be found of great assistance when distances to and from *intermediate* stations are required.

*Example 3.*

Distance required. Donamon to Portarlinton :—

Both of these are intermediate stations. A reference to the Index shows Donamon at page 106, and Portarlinton at page 120. Page 106 gives the distance :—

Donamon to Roscommon - - -	5 $\frac{1}{2}$
Roscommon to Tullamore - - -	40 $\frac{1}{2}$
and page 120 the distance between Tullamore and Portarlinton - - -	16 $\frac{1}{2}$
Total - - -	<u>62<math>\frac{1}{2}</math></u>

*Example A.*

Distance required. Grange to Kilsheelan :—

Both of these are also intermediate stations, but on the same line, no principal station *intervening*. Refer to Index for either. Take page 121 for

Kilsheelan :—	Miles.
Waterford to Kilsheelan - - -	22
<i>Deduct</i> Waterford to Grange - - -	7½
Distance Kilsheelan to Grange - - -	14½

Those journeys that extend over more than one line of railway have the exact distance travelled over *on each line* shown in small print, (these distances so printed are designated PART DISTANCES,) thereby indicating the route by which to proceed.

These part distances are given in miles and chains, as officially published by the Irish Railway Clearing House, but in adding the total distance the number of chains have been brought into miles at the following rate, viz :—

1 and up to 20 - - -	Miles.
21 „ 40 - - -	¼
41 and under 80 - - -	½
	¾

It should be distinctly understood that the routes herein laid down are the nearest, but circumstances may sometimes render it necessary to adopt other routes. The book has, therefore, been so framed as to meet *any* requirement of this description. For instance—

A reference to page 54 will show that the nearest route to Limerick from Dublin is *viâ* Birdhill and Killonan Junction - - - Miles.

The other and longer route is *viâ* Limerick Junction (page 78), and a reference to this heading will give the distance, viz :—

Dublin to Limerick Junction -	107½	
Limerick Junction to Limerick -	21½	
		129
Difference -		5½

When demanded, fractions of a mile in each company's local distance, and in each company's proportion of through distances, are to be paid for as miles.
